Board of Supervisors
1 Dr. Carlton B. Goodlett Place
San Francisco, California 94102-4689

Dear Supervisors:

Please find attached a report prepared by Recreation and Park in response to the requirements of Resolution 157-99 Lead Poisoning Prevention – Recreation and Park Department. It addresses the 4th quarter of FY02-03. To date, Recreation and Park has completed assessment and abatement at 107 sites since program inception. We have completed surveys for 16 out of 32 sites targeted for completion in FY02-03. Of the 16 sites surveyed, seven require abatement; abatement has been completed at two of those sites and is in progress for the remaining five sites.

Site surveys were not completed within the fiscal year as initially targeted due to difficulty securing an Environmental Consultant to perform the work. The Consultant originally being used was unable to continue performing the task due to contractual issues. These issues have been resolved, and surveys are once more underway. We hope to complete the remaining sites by the end of the summer.

I look forward to continuing the proactive development and implementation of this program. I hope that you and interested members of the public find that the Department's performance demonstrates our commitment to childhood lead poisoning prevention. Please look for our next report in October 2003.

Thank you for your support of this important program. Please do not hesitate to contact me with any questions, comments or suggestion you have.

Sincerely,

Elizabeth Goldstein
General Manager

Attachment 1. Implementation Plan Status Report

4th Quarter Status Report

Plan Item and Description	Status
I. Childhood Lead Poisoning Prevention Program	
a) Facility Maintenance Initiatives	
i) Proactive Hazard Identification and Control	
(1) Site Prioritization Revised after each cycle based on verified reports, documented Department programs, program participant youngest age, and presence of playground or schoolyards. Departmental facility and program use data, and the potential survey of childcare service providers will be evaluated for consideration as additional criteria for setting site priorities.	Children's Environmental Health Promotion program is assisting in polling licensed family day-care providers to see which parks they frequent. This information will be used to prioritize survey sites for FY03-04. This data expected to be available by the end of August 2003.
(2) Survey	32 sites were targeted for FY02-03 surveys. To date, 16 of those sites have been completed.
(3) Abatement	Of the 16 FY02-03 sites surveyed to date, seven require abatement. Abatement has been completed at two of those sites, and is in progress at the remaining five sites.
(4) Staff/Client Site Posting and Notification	Sites have been posted for abatement as required to notify staff and the public.
ii) Facilities Operations and Maintenance	
(1) Periodic Inspection	Periodic facility inspections for FY02-03 were due May 15, 2003. 61% of those inspections have been completed, and efforts to secure the outstanding inspections are underway. Voluntary staff training classes to give them the skill to complete these inspections was offered on April 23rd and May 1st. The visual identification of loose and peeling paint and how to report it to safety and maintenance staff was addressed in the training and is addressed in the periodic inspection form.

Plan Item and Description	Status
(2) Housekeeping	Housekeeping as it relates to lead was addressed as part of the inspection training courses offered on April 23rd and May 1st, 2003.
(3) Staff Training All new employees with significant responsibilities for Department facilities (Structural Maintenance, Custodial) will complete initial training. All employees having completed initial training requirements must complete refresher training as required.	Safety Awareness Meetings (SAMs) for Lead Hazard Awareness were required to be completed for Maintenance, Custodial and Recreation staff by May 15, 2003. Currently, 61% of those have been completed and efforts to secure the outstanding SAMs are underway. Lead training among Maintenance staff was last conducted in February of 2000. As of this date, maintenance staff reports that they have not performed lead work since that time and that necessary staff will be re-trained in the near future. The status of this item will be reported in the next quarter's report.

COMPLETED FY 00-01

Priority	Facility Name	Location	Fiscal Year Funding to Complete (includes survey and as-needed abatement)	Comments
1	Upper Noe Playground and Recreation Center	Day/Sanchez	99-00	
2	Jackson Playground	17th/Carolina	99-00	
3	Mission Rec Center-Treat Street	745 Treat Street	99-00	Originally on list as Mission Rec-Harrison Street. Incorrect, so name changed, and information on site removed.
4	Palega (aka Portola) Playground and Recreation Center	Felton/Holyoke	99-00	
5	Eureka Valley Playground and Recreation Center	Collingwood/18th	99-00
